Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

Response to Arguments

Applicant's arguments, filed June 22, 2007, with respect to Claim Rejections – 35 USC §102(e) and 35 USC §103 have been fully considered and are persuasive. The rejections of Claims 1-15 have been withdrawn and moot in view of the new groups of rejection. This Office Action is Non-Final and meant to replace the Non-Final Office Action (mailed March 22, 2007).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,2,4 are rejected under 35 U.S.C. 102(e) as being anticipated by Higuchi (US 7151563).

Regarding Claim 1, Higuchi teaches an image pickup apparatus comprising:
an imaging element which converts received light from an object into an image signal; a signal processing circuit device which processes the image signal;
a display device that displays a multi-dimensional coordinate chart having at least a first coordinate axis representing first changes in hue and a second coordinate axis representing second changes in hue which are different from the first changes in hue (*Fig. 8 shows a 2 dimensional coordinate chart with first axis representing changes in one hue, red, and the other dimension represents changes in blue*); and a user interface that allows a user to select a desired location setting within the multi-dimensional coordinate chart displayed in the display device, wherein the signal processing device performs image processing of the image signal according to the setting (*Col 8 Lines 29-45*).

Regarding Claim 2, Higuchi teaches the image pickup apparatus according to Claim 1, wherein the display device displays said the multi-dimensional coordinate chart together with an image displayed on the basis of the image signal (*Fig. 8*).

Regarding Claim 4, Higuchi teaches the image pickup apparatus according to Claim 1, wherein the display device displays an image of the object to be captured and superimposes the multi-dimensional coordinate chart on the image of the object to be captured (*as shown in Fig. 8*).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Higuchi (US 7151563).

Regarding Claim 3, Higuchi teaches the image pickup apparatus according to Claim 1, and in Fig. 8 shows the display showing the captured image at the same time as the multi-dimensional coordinate chart. Higuchi does not specifically teach the image and chart displayed at separate times on the screen, however it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the teaching of Higuchi to display the image and coordinate chart shown in Fig. 8 separately on the display and to switch between the two. This modification would produce predictable results and would give the user the same interface options but in a different manner.

Allowable Subject Matter

5. Claims 5-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure including Sakaguchi et al. (US 2003/0146984), Cooper et al. (US 6928187), Sakurai (US 2007/0024719).
